

In your last assignment, you have worked on https://github.com/CTYue/springboot-redbook/commits/06_map_per-exception

on top of that, please

1. Add proper logging statements for this project, please use slf4j as your logger.
2. Set up proper logging level.
3. Take screenshots
4. Instead of using embedded tomcat, setup an external tomcat server to bring up above application. Take screenshots.
